

The Open-Source AI Agent Skills Cheat Sheet

19 Battle-Tested Capabilities Grounded in the Open SKILL .md Specification (Anthropic Standard)

OPEN STANDARD
BROWSER & CLI READY

How Agent Skills Work: A skill is a plain folder with a `SKILL.md` containing  **Progressive Disclosure:** LLMs read only description: metadata until YAML triggers & runtime runbooks. explicitly triggered → *zero token waste*.

Squad 1: Creative UI, Graphics & Frontend Artifacts

6 SKILLS

frontend-design

9.4 KB

Distinctive art direction, intentional typography, color harmony, and avoiding generic sterile AI defaults.

✦ Anti-generic styling rules

web-artifacts-builder

3.1 KB

Elaborate, multi-component single-file web apps with inline state, reactive events, and zero build steps.

✦ Self-contained HTML apps

theme-factory

3.1 KB

Systemic design engine styling artifacts with 10 themes (Cyberpunk, Bauhaus, Nordic, Retro Terminal).

✦ Complete CSS token sets

algorithmic-art

19.3 KB

Generative p5.js art, Perlin noise flow fields, chromatic aberration, particle trails, and seeded chaos.

✦ Interactive p5.js canvases

canvas-design

11.7 KB

Pure HTML5 Canvas 2D / WebGL rendering, vector drawing algorithms, generative graphics, and visual layouts.

✦ Direct GPU canvas rendering

slack-gif-creator

7.8 KB

Frame-by-frame canvas animation rendering, celebratory animated SVGs, and micro-animations.

✦ Programmatic keyframe GIFs

Squad 2: Agent Architecture, MCP & Testing

4 SKILLS

skill-creator

32.9 KB

Meta-skill to author, calibrate, and lint new SKILL.md files with positive triggers and negative distractors.

✦ Self-replicating skill engine

mcp-builder

9.1 KB

Full Model Context Protocol server scaffold in TypeScript & Python with tools, prompts, resources & stdio/SSE.

✦ Turn-key tool integrations

claude-api

105 KB

Comprehensive reference for Anthropic API SDKs, streaming patterns, structured JSON schemas & prompt caching.

✦ Production API contracts

webapp-testing

3.9 KB

Toolkit for browser UI validation, state invariant assertions, regression test suites, and mock user flows.

✦ Automated invariant tests

Squad 3: Document Engineering & Binary File Synthesis

5 SKILLS

docx

6.7 KB

Generate Word docs via XML / python-docx with TOC, cover pages, headers & callouts.

✦ Formal reports

pdf

7.8 KB

Merge, split, OCR, table extract, watermark & form-fill with pypdf / pdfplumber.

✦ Zero-overflow PDFs

pptx

20.6 KB

Executive pitch deck generation via python-pptx with 16:9 layout & data cards.

✦ Investor decks

xlsx

8.3 KB

Financial modeling, pivot tables, multi-sheet budgets & Excel formulas via openpyxl.

✦ Automated spreadsheets

doc-coauthoring

15.4 KB

Collaborative RFC & PRD drafting with structured review stages & edit tracking.

✦ Living technical specs

Squad 4: Governance, Epistemic Safety & Comms

4 SKILLS

discernment-nudge

10.2 KB

Epistemic checkpoint: prompts user to examine implicit assumptions & failure modes on critical choices.

✦ Pre-mortem safety gate

brand-guidelines

2.2 KB

Official brand color tokens, typography scales, accessibility contrasts & brand voice consistency.

✦ WCAG contrast compliance

internal-comms

1.5 KB

Executive summaries, post-mortems, team updates, and all-hands memos crafted for signal-over-noise.

✦ High-signal memos

academy-guide

7.5 KB

Recommends matching educational courses, tutorials, and onboarding resources from Claude Academy.

✦ Curated learning paths

3-Step Lifecycle:

1

Discover: Agent matches YAML description: trigger

2

Mount: Load body markdown on demand into context

3

Execute: Synthesize verified code / artifacts via WebLLM or LPU
