

Anthropic Agent Skills Catalog Cheat Sheet

Official Breakdown: 15 Apache 2.0 Open-Source Capabilities + 4 Proprietary Document Skills

SKILL.MD SPEC
19 CAPABILITIES

Anatomy: A skill is a folder containing a **SKILL.md** runbook with YAML frontmatter + markdown execution procedures.

⚡ Progressive Disclosure: LLM only reads description: metadata until task triggers it → *zero context pollution*.

🧑‍🤖 Squad 1: Creative UI, Graphics & Frontend Artifacts (Apache 2.0 • Open-Source)

6 SKILLS

frontend-design

Apache 2.0

Distinctive visual art direction, intentional typography, color harmony, and avoiding generic sterile defaults.

✦ Anti-generic styling rules

algorithmic-art

Apache 2.0

Generative p5.js art: Perlin noise flow fields, chromatic aberration, particle trails, and interactive parameter exploration.

✦ Autonomous p5.js canvases

web-artifacts-builder

Apache 2.0

Complex multi-component web apps using React, Tailwind CSS, Vite & shadcn/ui with init and bundle scripts.

✦ React + Tailwind + shadcn

canvas-design

Apache 2.0

Poster-style visual art and static designs exported as .png and .pdf documents from written design philosophies.

✦ Poster art (.png / .pdf)

theme-factory

Apache 2.0

10 pre-set themes (Arctic Frost, Botanical Garden, Desert Rose, Midnight Galaxy, Golden Hour, Sunset Blvd).

✦ 10 verified color/font presets

slack-gif-creator

Apache 2.0

Knowledge and utilities for creating animated GIFs optimized for Slack with frame, color & file size constraints.

✦ Slack-optimized animated GIFs

⚡ Squad 2: Agent Architecture, MCP & Testing (Apache 2.0 • Open-Source)

4 SKILLS

skill-creator

Apache 2.0

Meta-skill to author, calibrate, and lint new SKILL.md files with positive triggers & negative distractors.

✦ Self-replicating skill engine

mcp-builder

Apache 2.0

Full Model Context Protocol server scaffold in TypeScript & Python with tools, prompts, resources & stdio/SSE.

✦ Turn-key tool integrations

claude-api

Apache 2.0

Exhaustive reference for Anthropic API SDKs, streaming patterns, structured JSON schemas & prompt caching.

✦ Production API contracts

webapp-testing

Apache 2.0

Interactive local web app testing with Playwright: UI debugging, browser screenshots, and console log capture.

✦ Playwright UI verification

🛡️ Squad 3: Governance, Epistemic Safety & Comms (Apache 2.0 • Open-Source)

5 SKILLS

discernment-nudge

Apache 2.0

Epistemic checkpoint: prompts user to examine implicit assumptions & failure modes on actionable plans.

✦ Pre-mortem safety gate

brand-guidelines

Apache 2.0

Official Anthropic brand colors, typography scales, accessibility contrasts & brand voice consistency.

✦ WCAG contrast compliance

internal-comms

Apache 2.0

High-signal internal memos: status updates, post-mortems, team syncs, and 30–60–90 day planning drafts.

✦ High-signal memos

academy-guide

Apache 2.0

Matches user queries against Claude Academy course catalog for tutorials, videos & onboarding guides.

✦ Curated learning paths

doc-coauthoring

Open Standard

Structured collaborative workflow for drafting technical specs, RFCs, and PRDs with incremental review phases.

✦ Living technical RFCs

🔒 Squad 4: Proprietary Document & File Tooling (Anthropic Proprietary • Python Runtime)

4 SKILLS

docx

Proprietary

Create/edit Word (.docx/.dotx) via python-docx & XML archives. Generates formal reports with TOCs & letterheads.

⚠️ Python/Office • All rights reserved

pdf

Proprietary

Merge, split, OCR, table extract, watermark & form-fill using pypdf, pdfplumber & CLI pdftk tools.

⚠️ Python CLI • All rights reserved

pptx

Proprietary

Pitch deck and slide generation via python-pptx with 16:9 widescreen layout, visual cards & layout trees.

⚠️ Python/Office • All rights reserved

xlsx

Proprietary

Spreadsheet data engineering: financial models, formulas, pivot tables & charts via openpyxl & pandas.

⚠️ Python/Office • All rights reserved

3-Step Lifecycle:

1

Discover: Agent matches YAML description: trigger

2

Mount: Load body markdown on demand into context

3

Execute: Synthesize verified code or artifacts via WebLLM / LPU
